

ORPHANWARE

March 1, 1988
ORPHANWARE
5665 Myers Road
Akron, OH 44319
216-882-4720

Mon. through Fri. 9:00 to 5:00
Sat 10:00 to 3:00

At other times, we can be contacted through our BBS at the same number. Set your modem software for 8-N-1 at 300 or 1200 baud. We run under the TDOS system and have UPLOAD and DOWNLOAD capability in 2 data libraries, one for CP/M programs and 1 for EOS type programs. All upload and download is with the XMODEM protocol. We have almost 2.5M of on-line storage, so there is plenty of software to download and plenty of space for uploading. We also have a message base with about 100 messages on line in three different message bases all the time to allow everyone to communicate with everyone else. Also on the BBS is what I call MIDNIGHT MADNESS. This is where I offer for 1 night or even for only a few hours, Orphanware products for unusually low prices. The BBS operates when the office is closed. You can leave CREDIT CARD and COD orders on the board in the feedback section with complete confidentiality.

HARDWARE

MX64 MEMORY EXPANDER

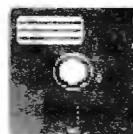

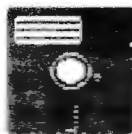

Expand the ADAM memory to the full 144K. It is useful for SMARTWRITER, ADAMCALC, SMARTBASIC 2.0, CP/M and other programs that are now too numerous to count. When combined with software such as RAMDISK from Walters Software or MEGAdisk by Digital Express, you can really unleash the power of the ADAM. We have only a few of these left and will not be offering them after about FEB. 15, 1988.

\$ 45.00 + Shipping
32.00 + Shipping (full kit)

"MX64 SHORT KIT"

This is the MX64 PC board, instructions for assembly and a list of parts and sources for those parts. In general, you can get parts for about \$14.00 or there about. We can not provide warranty coverage as we do not have control of the quality of parts used. We will supply RMTST.COM on a CP/M formatted disk to allow you to test the board.

\$ 15.00 + Shipping

MX-128 MX-256

Here are the super memory expanders for the ADAM. Increase the size of the CP/M M: drive to 246K of super fast drive space. Cut assembly time by up to 95%.

\$ 115.00	MX128
155.00	MX256
50.00	MX256 with 0K installed RAM
70.00	MX256 with 64K installed RAM
255.00	MX512 (available by request only)

NOTE these prices are subject to change with out notice, call in your order or order through the ORPHANWARE BBS.

You will need a PIA2 printer interface or the A2 addresser to operate the MX boards with more than 64K installed RAM. If you have the PIA2, return it for connection to your MX256K board. If you are using the EVE SP-1, order the A2 addresser for 17.50.

Software is provided for CP/M only. Software for EOS is available from Digital Express and Walters Software. Both are excellent programs and can be found in the software portion of the catalog or can be ordered directly from the manufacturers.

PIA2 PARALLEL PRINTER INTERFACE

This interface will allow you to connect almost any popular parallel dot matrix printer to the ADAM. Software is provided to drive your printer from Smart Basic, Smart Filer, Smart Letters and Forms, AdamLink III and CP/M. See the software section of this catalog for software for ADAMcalc patches.

\$ 37.95 + Shipping
27.00 + Shipping (KIT)
Add \$3.50 for Tape software

PARALLEL PRINTER CABLE

\$ 17.00 + Shipping (Shipping included when ordered with an interface)

AVATEX 1200e MODEM

Here is the package to add high speed communications to the ADAM. It comes complete with the modem, RS232 interface and all cables. We also provide three different software packages (IMP, MEX and MADAM7) to operate the modem. This modem can be moved on to other computers that have a serial interface. The AVATEX is fully HAYES compatible.

\$ 149.95 + Shipping (\$8.88)
\$ 64.95 + Shipping (Serial interface only)

80 COLUMN VIDEO UNIT

With this expansion board, you can have a true 80 column video display with CP/M or our new TDOS operating system. It will work with either the Stand Alone computer or the Expansion Module. You will need to add a "Monochrome Composite 80 column video monitor". The unit comes with its own power supply, so there is no additional drain on the ADAM power supply. We are currently considering re-writing Smart Basic (tm) to run in a non graphics mode on the 80 column display. Please write and let us know if you would be interested.

\$ 239.95 + 8.88 Shipping
209.95 + 8.88 Shipping (for use with the EVE SP-1)
369.95 + 8.88 Shipping (includes WORDSTAR 4.0)
339.95 + 8.88 Shipping (with WORDSTAR for EVE)

A NOTE ON WORDSTAR 4.0

This is WORDSTAR 4.0 on ADAM formatted disks and installed for the 80 CVU. (Specify drive size so that we can put it on disks that are correct for you computer, such as 160K, 255K, 320K or 720K). Please specify the printer that you will be using so that we can configure WORDSTAR with the correct drivers. (The configuration can be done by the consumer, but we do it to allow you to just enter WS<CR> and run). Please note that WORDSTAR 4.0 currently lists for \$295.00 from Micro Pro.

ORPHANWARE CLOCK BOARD

Battery backed up clock for use with CP/M, EOS and really for supporting BBS systems. Available about APRIL 1, 1988

ORPHANWARE TALKER

Speech synthesis for the ADAM. With software for DEMO purposes only. We will provide instructions for programming the board. This board will be software compatible with other existing Speech boards. Available about May 1, 1988.

COMING SOON

18 or 28 Mega Byte Hard Disk interface. The production of this unit will depend on demand. It will include only the interface. We will have available the controller, but we will not sell the hard disk unit itself. These can be purchased from several sources. We have not totally defined the capabilities yet, but we will try to provide a method to partition the disk into an EOS section and a CP/M section. Watch for more details soon. This should be out in the early fall of 1988.

DISK DRIVE CONVERSIONS

We can convert your ADAM disk drive to either a 320K double sided drive, or a 720K 3.5" disk drive. They are totally EOS software compatible and we provide the patches for CP/M. Also includes one of the better format programs available for the "big" drives.

\$ 135.00 (320K) + 8.80 Shipping
175.00 (720K) + 8.80 Shipping.

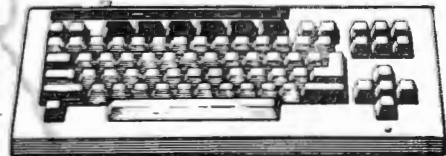

All you need to do is to send us a functional ADAM disk drive and proper payment and we will return it generally in 18 days or less converted. If your drive is broke, we will have to charge you for repairs prior to doing the modification. This will be charged at current Orphanware Service Center rates.

COLECO POWER SUPPLY COVER

This is a simple plastic cover for the surplus Coleco power supplies that most people are now using. They make the power supply appear much better and reduce the safety hazard of them being open. Will not cause a heating problem. You only need to drill 4 holes in the power supply and install the drive with 4 sheet metal screws. Takes about 5 minutes to do.

\$ 15.95 + 4.00 Shipping

KEYBOARD CABLES

Replacement cables for the keyboard and disk drives.

\$ 3.00 for 6 foot. Add .75 for each additional needed. Add 3.30 for shipping

SOFTWARE

QUICKOPY 4.0

A new version of a venerable old favorite. This time upgraded to use the 256 and 512K boards, and allows copying the 720K disk drives. There is not much more to be said about this one.

\$ 19.95 + Shipping
Add \$3.00 for tape version

WORDSTAR version 4.0

Copyright (c) 1987 MicroPro

This is it! Absolutely the BEST word processing system available for the home computer! This is the CP/M version of WordSTAR 4.0 and it requires you to own a copy of Coleco's CP/M 2.2 and Assembler Copyright (c) Digital Research. MicroPro originally allowed the CP/M version to be purchased for \$89.95 as an introductory offer. Now, the \$89.95 price is reserved for those with a LEGAL copy of an earlier version of WordSTAR. The current list price of WordSTAR 4.0 for CP/M is \$295. If you use your ADAM for any text oriented purpose (including programming) then this is an absolute "must have" program. Through a special arrangement with executives at MicroPro, we are able to offer WordSTAR 4.0 pre-configured to your system characteristics at an unbeatable price. Please let us know when ordering the following information to allow the proper setup for your use...

1. The size and number of your disk drives
2. What printer you will be using
 - a. Adam's SmartWriter Printer or
 - b. A dot-matrix printer
3. If using a dot-matrix, what make and model number?
4. If you are using only single sided drives, some of the larger files will be provided on DDP format, such as the Dictionary

\$ 149.94 + 3.30 Shipping
Add \$15.00 for Tape (data pack's not recommended)

RAMDISK 256

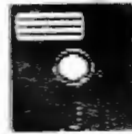

Here is another fine RAMDISK program from Walters software to support the RAMDISK in Basic 1.0. This like all Walters software products is easy to use. Once you have used it, you will not want to be without it again.

\$ 24.95 + 3.30 Shipping
Add 3.00 for tape

FILE MANAGER

From Tony Morehen of AJM Software. This is the finest general utility for the the ADAM EOS system that I have seen. It has all the best of everything. From simple block editing and printing utilities to copying and directory management features, this program will soon become the most used software in your library. Please call our BBS and down load the the documentation for it to see just what it will do. The complete documentation file is also located on the disk itself, and can be printed from the disk!

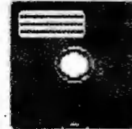

\$ 19.95 + 3.30 Shipping
Add \$3.00 for Tape

MEGADISK

From Digital Express comes this fine implementation of the the RAMDRIVE for Basic 1.0. This disk comes loaded with PD software that will enhance the Basic Operation of the MegaDisk program. It will work with any size memory board from 64K to 512K

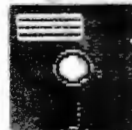

\$ 24.95 + 3.30 Shipping
Add 3.00 for tape

CALCPATCH

Thanks to Tom Clary, you can now use your dot matrix printer to produce crisp looking spreadsheet printouts with AdamCALC. This has always been considered to be one of the best spreadsheet programs around for any computer, but it had one limitation... the relatively slow SmartWriter Printer. Now utilize the full speed capabilities of your dot matrix printer. Just load SmartBasic and run CalcPatch. You will be told to insert a copy of your AdamCalc program onto which the patch will be installed. Also on this disk your will receive FASTPATCH 2.0, an earlier version of CalcPatch, and a printer patch for CP/M.

\$ 14.95 + Shipping
Add \$3.00 for Tape

DISK COPY SERVICES

We can copy almost any format of CP/M to the ADAM format. You must send us the original CP/M software and enough formatted ADAM disks to copy to. Price is \$3.00 for the first side and \$2.00 for a second side if flippies are being used. (You must format before you send it to us). If we can't copy it, we will send it to someone who can and the charge will be the same. We will give a 10% discount for more than 10 disks at a time.

ADAMLINK III

Here is the long awaited telecommunications software for the internal 300 baud AdamLink modem from Coleco. Tom Clary has really revised this software package to make it a "must have" program for all who use the AdamLink modem. Tom has added a patch to permit the use of FASTPATCH so that your dot-matrix printers can be used to print on-line. If that isn't enough, all the features for file capture found in AdamLink II are retained in this version. The most important addition to the software is the new provision for true XMODEM UPLOADING and DOWNLOADING of programs! No longer will you need to plod through the old routine of using a CP/M modem program to download a file then use another CP/M program to convert the thing back to a usable EOS format, and then praying that the whole thing will run! Just download with AdamLink III's XMODEM, boot your SmartBASIC, VideoTunes, etc. software, and use the program you downloaded! It's that easy to use. Rumor has it that there will soon be an ADAMLINK 4. This one will support 1200 baud through a HAYES compatible modem on the side port.

\$ 19.95 + Shipping
Add \$3.00 for Tape

REPAIR SERVICES

Send all of your broken "stuff" to Thom Andree of the:

ORPHANWARE SERVICE CENTER
5641 Leibold
Huber Heights, OH 45424

or Call 1-513-237-5305
